Summary

Software architect with 5+ years building enterprise SaaS on ASP.NET Core and Azure. I own the architecture and delivery of a 24/7 security operations platform that handles Microsoft Defender and Sentinel incidents in real time for 40 customer tenants and 100 internal users. I lead a distributed team of 8 engineers in the Philippines and work daily with stakeholders in the UK.

Technical Skills

Architecture & Backend	Microservices, Clean Architecture, Multi-tenant SaaS, ASP.NET Core, C#, REST APIs, SignalR, Node.js, NestJS
Cloud & DevOps	Azure, Azure DevOps (Boards, Pipelines), CI/CD, Docker, Kubernetes, Helm
Data	Azure Cosmos DB (NoSQL and graph), SQL Server, MySQL, Firebase
Security & Identity	Microsoft Entra ID, Microsoft Defender, Microsoft Sentinel, OAuth 2.0, OpenID Connect
Frontend & Mobile	Vue 3, React, TypeScript, Angular, Flutter, Dart
AI	LLMs, RAG, Agentic AI, Semantic Search

Professional Experience

Wizard AI (part of Wizard Group, UK)

Amman, Jordan

SOFTWARE ARCHITECT

May 2025 – Present

- Own the architecture and delivery of CyberShield, a 24/7 real-time platform for Microsoft Defender and Sentinel incidents and support tickets, serving 40 customer tenants and 100 internal users.
- Lead and mentor a team of 8 engineers in the Philippines, working daily with stakeholders in the UK.
- Delivered CyberShield front-end v3 (Vue 3, TypeScript) and refactored the ASP.NET Core microservices, database layer and Helm charts.
- Designed Azure integrations ingesting support mailboxes into Cosmos DB and incident entities into a Cosmos DB graph.
- Built CI/CD pipelines in Azure DevOps, cutting deployment time by 30% and improving response times by 60%.

Wizard AI (part of Wizard Group, UK)

Amman, Jordan

SENIOR FULL STACK DEVELOPER

Jun 2024 – May 2025

- Managed the Technical Support portal (ASP.NET monolith, React with TypeScript), covering development, releases and support until my promotion.
- Resolved lag across most pages of the portal by optimizing SQL queries and indexing, and adding server-side pagination and lazy loading.
- Introduced Azure Cache for Redis and implemented caching across the whole system, making API responses significantly faster.
- Built integrations with Microsoft Entra ID, Microsoft security services and Azure.
- Contributed to CI/CD pipelines, automated deployments and testing in Azure DevOps.

Awael Technologies

Amman, Jordan

SOFTWARE DEVELOPER

Jul 2021 – Jun 2024

- Led a team of 3 engineers from May 2023, running sprint planning, client communication and demos using Agile.
- Delivered around 15 custom business apps for clients, including e-commerce, delivery, inventory, cash van sales, accounting, dashboards and HR self-service.
- Built cross-platform apps in Flutter and Dart, and ASP.NET Core and Node.js APIs on SQL Server, MySQL and Firebase.
- Designed app architectures and admin portals, deployed on IIS.
- Published and maintained apps on Google Play, the Apple App Store and Huawei AppGallery, including post-release support.

Projects

First Chance Founder and Product Owner. Car buying and rental platform built with Flutter and ASP.NET Core; led product strategy, architecture and deployment.

Automate Lead Mobile Developer. Taxi and towing platform built with Flutter and NestJS, covering the mobile apps and backend integrations.

Education

Princess Sumaya University for Technology (PSUT) *Amman, Jordan*

BACHELOR OF COMPUTER SCIENCE *2019 – 2021*

- Transferred from UCSI University, Kuala Lumpur, Malaysia (2017 – 2018).
